

Volumetric Flasks

Class A, Low-Actinic Amber, F Stopper, To Contain

SIBATA 2307A-Series Low-Actinic Amber Volumetric Flasks meet ASTM E-288 Class A Specifications & USP Standards for Volumetric Glassware.

These flasks feature machine-blown bodies and heavy-beaded, heavy-tubing necks, tooled for F stoppers. The graduation line is sharp and permanent; large, white, block-letters allow the labeling to be easily read. Each flask also has a large marking square. The low-actinic amber glass provides protection for materials sensitive to light.

All sizes are supplied with a glass F stopper.

Specifications

Cat. No.	Capacity (mL)	Tolerance (\pm mL)	Stopper No.	Approx. O.D. x Height (mm)
2307A-10	10	0.02	9	28 x 95
